PS Postal Scales

Perfect for Letters and Parcels

Ideal for Shipping and Mailing via USPS

Rugged and Reliable Design

PS Scales stand up to the roughest handling at high volume retail counters, mail rooms or self service kiosks, and provide years of trouble free use.

- Engineered for durability with heavy duty steel and die cast metal frames.
- Designed with rugged overload protection to provide shock and impact resistance up to 300% of capacity.
- Adjustable filter settings reduce environmental vibration noise for rapid settling and quick measurements.
- Automatic temperature compensation ensures reliable operation in a wide range of environments.

USB or Serial

Simple Set Up and Operation

PS Scales arrive complete and pre-configured for use with all major retail and postal Point-of-Sale systems making set up fast and easy with no complicated programming.

- Plug-and-Play connection to your PC via either USB or RS232 connection.
- No installation required of USB device driver, protocol is compatible with HID-POS standard and the Windows™ HID device driver ŦŦ.
- Large easy to read display provides the best visibility with an adjustable viewing angle and the option for remote mounting. Two button operation is simple and intuitive.
- PS Scales can be easily customized for optimal performance through simple set up parameters and control settings.

Complete Product Offering with Options and Accessories

PS Scales come in a range of sizes and capacities to best fit your application and budget.

- Standard platter options include heavy duty plastic and premium stainless steel versions.
- Ergonomic ball top platters make it easy to move heavy packages on and off the scale with minimal effort and are ideal for POS use.
- Single or double-sided accessory displays are available in wall or tower mounted configurations, making it easy for customers and operators to see displayed weight in any location setting.

Versatility to process letters and parcels with a single scale

Advanced loadcell technology and sophisticated electronics ensure PS Scales meet or exceed the precision, accuracy and long term stability required for Legal-For-Trade pricing applications.

- NTEP, OIML and EC approved.
- Multi-interval, Auto Ranging technology allows PS Postal Scales to accurately weigh light letters and heavy parcels. The PS scale is like having multiple scales in one.
- Meets USPS accuracy specification of 1/32 oz for letters
- The Expanded Weight feature allows verification of the scale's precision.
- Patented GeoCal feature provides the best accuracy at the lowest cost by precisely compensating the sensitive factory calibration for local gravitational differences, eliminating onsite calibration by a technician regardless of the scale's location.
